SUMMARY

Results-driven Data Analyst with expertise in predictive and advanced analytics, data engineering, and cloud solutions. Skilled in Python, SQL, Azure Databricks, and AI-driven automation, with a proven record of transforming complex datasets into actionable insights across investment banking, telecommunications, healthcare, and renewable energy. Strong in stakeholder engagement, data governance, and business intelligence visualisation.

TECHNICAL SKILLS

Programming: Python (Pandas, NumPy, TensorFlow, Scikit-learn) | R | SQL | HTML
Tools & Platforms: Azure Databricks | Microsoft Copilot | Git | SSMS | Power BI | Power Platform | Tableau
Data Engineering: ETL Processes | Data Warehousing | Database Management
Analytics: Predictive Modelling | Sentiment Analysis | Text Extraction | Time Series Analysis
AI & Automation: Programmatic AI Agents | API Integration | Agentic AI Automation
Business Intelligence: Advanced Data Visualisation | Statistical Analysis | Process Optimisation
Project Management: Stakeholder Management | Resource Planning | Requirements Gathering

EXPERIENCE

Senior Analyst
BDO LLP

Jan 2023 – Present
London, United Kingdom

- Led optimisation of an enterprise-scale data migration project and banking reconciliation system initiatives, leveraging big data technologies and ETL processes.
- Developed and deployed predictive analytics models and implemented interactive Power BI dashboards to support business performance monitoring.
- Performed in-depth system efficiency reviews and analytics to identify usage trends and optimisation opportunities across investment banking, telecommunications, and energy sectors.
- Designed and implemented robust data governance frameworks, ensuring compliance and data quality standards were maintained across projects.
- Managed senior stakeholder relationships and coordinated cross-functional teams to deliver complex technical solutions within project timelines.
- Built programmatic AI agents, including an automated complaints handling agent, to streamline workflows using Microsoft Copilot and API integrations, improving efficiency in complaint resolution and reporting.

PROJECTS

AI-Powered Complaints Agent | Microsoft Copilot, API Integration, Python

2025

- Developed an automated complaints handling agent leveraging AI APIs and Microsoft Copilot to streamline user input processing, complaint resolution, and reporting.
- Built real-time dashboards and visualisations to track complaint resolution metrics, significantly reducing manual effort and improving client satisfaction.

Reconciliation Logic Review | Financial Services, Data Governance, Risk & Compliance

2025

- Assessed and validated reconciliation logic across legacy systems to ensure data completeness and regulatory compliance.
- Delivered recommendations that improved data reliability, reduced risk exposure, and enhanced strategic agility.

ESG Data Model Optimisation | Waste Management, Data Governance, KPI Reporting

2025

- Reviewed and optimised ESG data models to align with net-zero targets and evolving reporting frameworks.
- Improved data accuracy, reduced manual effort, and strengthened decision-making through a phased implementation roadmap.

Revenue Assurance & Billing Audit | Telecommunications, Databricks, Power BI

2024

- Reconciled 10M+ daily transactions to uncover £15.5M in potential revenue leakage and billing discrepancies.

- Enhanced billing transparency and operational efficiency through data-driven insights and governance recommendations.

HCM Data Migration | Health, Azure Data Factory, Python, Workday 2024

- Engineered scalable ADF pipelines and Python scripts to automate HCM data transformation and migration for 17K+ employees.
- Enabled a 2-day cutover and delivered £1.2M in project value while establishing reusable components for future initiatives.
